Hand Finishing
Inventory Management
Shipping / Fulfillment Services
Complete Digital Bindery

About Tucker

Tucker Printers has been in the Rochester, NY area since the 1960's, and services many clients across the state and throughout the country. Our facility is equipped to produce anything from small volume variable printing to large volume offset printing and packaging. We can die cut, window patch, fold, glue, stitch, store, and fulfill all under one roof. This allows us to have more control over the workflow for quicker turnaround and higher quality. In addition, Tucker is a G7 Master Certified printer that uses wind energy & soy based inks.

Packaging

As we continue to increase our capabilities and acquire new equipment, we are growing into a packaging leader. Our facility regularly produces packaging prototypes and small run packaging on our digital presses. We can also apply anti-theft tagging inline on our folder gluer, which is equipped with a state of the art glue detection system. Managing hundreds of different sku's on our folder gluer or in our warehouse is no problem, with the use of our barcode reading software and real time inventory management. We also produce elaborate hand-assembled pieces for the cosmetic and health and beauty industries.

Flex Mailer

Our team designed and patented the RR Donnelley Flex Mailer. The Flex Mailer is approved by the USPS as an automated flat and can save our customers over a dollar per piece. The Flex Mailer converts an item that would typically mail as a parcel and reclassifies it as an automated flat. To learn more, visit:

Gusset Mailers, Stayflats and Presentation Boxes

We do more than just the Flex Mailer and standard packaging. We produce everything from tuck cartons to gusset mailers to custom presentation boxes, and a variety of things in between. We have two high-speed diecutters and two folder gluers that can handle just about any packaging project you would like to send our way!
